## CRIMINAL WORK

Most of the criminal work that we do is done on legal aid. You may be able to qualify for legal dependant on the seriousness of your case and your income. Please contact us for information regarding legal aid eligibility.

## NON CRIMINAL WORK

Other areas of work are conducted on a fixed fee basis. This means that we agree a fee at the outset so that you are always aware of how much your case will cost. If further costs are likely to be incurred this will always be agreed with you before the work is undertaken.

## DRIVING MATTERS

Legal aid is not available for most driving matters. Our fees for driving matters will depend if the matter is contested or not. For a non contested magistrates court appearance our fees will be in the region of £1000. If the matter is contested our fees will be in the region of £2000. These estimates apply to cases within the Greater London area. The exact fee in your case will always be agreed with you before we commence the case.

## IMMIGRATION MATTERS

We charge a fixed fee of £250 for an initial consultation. This covers seeing you at our office and considering your case and any documentation that you may already have. We will then give you an opinion on the strength of your case and the potential next steps. If our advice is to lodge an immigration application, and you instruct us to do so, then the consultation fee will be deducted from the cost of the application. Although it is difficult to give a precise figure as each case is different, the table below gives an indication of our fees for common applications. The exact fee in your case will always be agreed with you before we commence the application. Please note that our fees do not include disbursements, such as Home Office fees, they are legal fees for our work.
